Arbeitsgruppe Pferd presents:

# EQUINE FASCIAL MANIPULATION DAYS 2019

Bingen and Waldalgesheim, Germany · September 3–6, 2019

## PROGRAM

This course will show the participants the importance of understanding fascia, its 3-D network, the identification of musculoskeletal dysfunctions in reference to the animal fascial system and to apply the Fascial Manipulation system as taught by Luigi Stecco. The goal of the course is to identify specific points of fascia causing movement restrictions and then to manipulate them, often far away from the problem area, to restore movement. These will be taught combining theoretical and practical elements as well as a live demonstration of all steps of treatment.

► **Why attend AGPferd courses?** Because there will be instructors of different professional and geographical background with outstanding knowledge and experience on the subject tackled.

► **What is different in AGPferd events?** We work in small groups of mostly very experienced participants. Apart from lecturing our instructors present their knowledge and skills in practical demonstrations. Plenty of time is always reserved for discussions. All this under professional conditions, with good food and in a collegial and relaxed atmosphere.
